SUMMARY

Detail-oriented MCA student and aspiring software engineer with hands-on experience building web applications and data-driven solutions. Proficient in Python, Java, JavaScript, and SQL with solid computer science fundamentals. Focused on writing clean, maintainable, and high-performance code that improves user experience and internal processes.

EXPERIENCE

Oasis Infobyte (OIBSIP)

Oct 2025 – Nov 2025

Web Development & Designing Intern

- Collaborated with cross-functional stakeholders to translate ambiguous requirements into clear technical tasks and built responsive web interfaces using HTML, CSS, and JavaScript for internal-facing applications.
- Improved application performance and maintainability by optimizing DOM updates, refactoring code using standard design patterns, and integrating Python-based test scripts to automate regression testing.

PROJECTS & LEADERSHIP

Role of Artificial Intelligence in Enhancing Academic Success and Student Life

[View Project](#)

- Led a quantitative study of 250+ students on AI tool adoption in academics, ensuring statistically valid sampling and reliable data collection.
- Cleaned and analyzed the data in Python to uncover key trends, benefits, and challenges of AI-assisted learning on academic performance and student well-being.

Smart Recipe Generator

[View Project](#)

- Developed a responsive recipe recommendation web application using HTML, CSS, and JavaScript, applying modular design patterns for maintainable code and optimizing dynamic UI updates for fast client-side rendering.

News Website Scraper

[View Project](#)

- Implemented a Python-based news web application with real-time web scraping, basic sentiment analysis, and CSV/Excel export, using requests/BeautifulSoup for data ingestion and pandas for processing.

Java Quiz Application

- Built an object-oriented Java Swing quiz application with timed questions, automated scoring logic, and event-driven UI components, improving usability and code reusability.

Food Delivery Time Prediction using Machine Learning

[View Project](#)

- Developed a machine learning-based food delivery time prediction system in Python using regression algorithms, performing feature engineering and model evaluation to improve prediction accuracy.

Meri Panchayat – Public Issue Reporting Portal

[View Project](#)

- Engineered a scalable Flask + SQLite backend with secure Email OTP and RBAC, reliably handling 100+ concurrent citizen requests.
- Built a custom i18n engine for Kannada, expanding access for non-English-speaking users and improving digital inclusion.
- Designed a responsive citizen portal with image uploads and live issue tracking, boosting transparency and user experience.
- Created an analytics dashboard for Panchayat officials with real-time issue metrics, enabling faster, data-driven decision-making.

WhatsApp Chat Scraper | Python Project

[View Project](#)

- Built an interactive web app that extracts WhatsApp chat data and visualizes insights like total messages, most active users, conversation trends, and frequently used emojis.
- Designed the interface to present these analytics in a clear, engaging, and user-friendly way, making chat patterns easy to understand.

Resume Builder Web Application

[View Project](#)

- Built a form-based interface to capture user details and generate resumes dynamically and Implemented a live preview that updates in real time as users type.
- Added PDF download support for generated resumes, and designed a responsive layout using Tailwind CSS..

EDUCATION

St. Agnes College (Autonomous)

Present

Master in Computer Applications (MCA)

Dr PDP-PSP GFGC

2024

Bachelor in Computer Applications (BCA)

SKILLS & ADDITIONAL INFORMATION

Technical Skills: Full Stack Development , Python , Java , HTML , CSS, JavaScript, SQL, Canva, MS Office Suite , VS Code, PyCharm

Certifications: Participated in a three-day Hands-on Workshop on Internet of Things, AWS-Solutions Architecture Job Simulation Certification, Electronic Arts's Software Engineering Job Simulation, Microsoft Excel Advanced Course Certificate (Udemy), ExcelR 30-Hour Certification Programs: Data Structures and Algorithms Training; Internet of Things (IoT) Training
